

## MongoDB – DB and Collection Creation:

Connected to MongoDB Atlas successfully.

MongoDB rejected the name `mongo db mcp` because spaces are invalid for this namespace. I created and verified:

- Database: `mongo_db_mcp`
- Collection: `initialData`

## Insert data into the DB and List the collection and DB along with data:

Add 2 sample data into this collection

Completed 5 steps in 9s

Added and verified 2 sample documents in `mongo_db_mcp.initialData`:

- Aarav Sharma, QA Engineer
- Maya Patel, Product Manager

`mcp.json:55`

List the collection created

Completed 3 steps in 5s

The collection created is:

`initialData` in database `mongo_db_mcp`

List only the db created now

mongo\_db\_mcp

mcp.json:55

List the data in the db created now

Completed 3 steps in 4s

Data in mongo\_db\_mcp.initialData:

```
[
  {
    "name": "Aarav Sharma",
    "email": "aarav.sharma@example.com",
    "company": "Northstar Labs",
    "role": "QA Engineer",
    "status": "active"
  },
  {
    "name": "Maya Patel",
    "email": "maya.patel@example.com",
    "company": "BluePeak Systems",
    "role": "Product Manager",
    "status": "active"
  }
]
```

## Drop the collection:

Drop the collection initialData alone

Completed 6 steps in 8s

Dropped only initialData from mongo\_db\_mcp. The database remains intact and now has no collections.
