

LLM Configurations under Settings tab:

The screenshot shows the 'Settings' page in the Testleaf application. The left sidebar contains navigation links: Dashboard, Editor, Execution, History, and Settings (which is highlighted). The main content area is titled 'Settings' with the subtitle 'Configure your preferences and defaults'. There are tabs for 'Browser', 'Execution', 'LLM' (selected), 'Appearance', and 'API'. A 'Reset All to Defaults' button is in the top right. The 'LLM Settings' section includes a 'Save LLM settings' button and a 'Reset' link. The settings are organized into two columns: Provider (Groq), Model (openai/gpt-oss-20b), API key (Configured, enter to replace), Base URL, Max tokens (2048), and Temperature (0.7). A green status message 'LLM settings saved' is displayed at the top left of the settings area.

Plain English steps supported:

The screenshot shows the 'Feature Editor' page in the Testleaf application. The left sidebar contains navigation links: Dashboard, Editor (highlighted), Execution, History, and Settings. The main content area is titled 'Feature Editor' with the subtitle 'Write and validate your Gherkin feature files'. There are buttons for 'Import', 'Export', 'Save', and 'Load', followed by an 'Unsaved' indicator. The main text area contains a Gherkin feature file with the following steps:

```
1 Feature: Example Feature
2 Scenario: Create a new lead successfully
3   Navigate to http://leaf taps . com / opentaps
4   Enter the username " Democsr2 ".
5   Enter the password " crmsfa ".
6   Click the Login button.
```
